Street Gang Investigations

Hosted By:
Northeast Counterdrug Training Center

This course explores the current trends, identifiers, and dynamics of street gang investigations. Understanding and identifying gang culture both on the street and in correctional facilities requires investigators from both local law enforcement and corrections to work together and share information. The intent of this course is to prepare officers in both large and small agencies to properly identify and interdict gang activity in their respective jurisdictions, collect and manage their gang intelligence, and communicate this information with neighboring jurisdictions and correctional facilities. Many states have their own gang enhancement statute but is sometimes, never utilized to prosecute at the state level. The instructors of this course will show you how to take the evidence and stored gang intelligence in your gang case, and apply it in the courtroom. Not all street gangs establish themselves with a nationally recognized gang name.

The instructors will provide reasonable explanations why their local hybrid street gangs are just as violent, and dangerous as nationally recognized gangs are in larger cities. This class will explain the command structure, membership requirements, and adopted signs and symbols, hybrid gangs will create. Additional gang evidence will also be covered such as step-by-step examples of how to testify as a gang expert, drug trafficking expert, armed subject expert, and cellphone records expert in court, to assist your state's attorney's office in prosecuting your local gang members. This course will also explain why your gang investigation unit plays an important role in community trust and show examples of how to build those relationships between police and community.

WHEN

April 25 – 27, 2022

Registration: 7:30 a.m.

Class: 8:00 a.m. – 4:00 p.m.

- A Government issued ID will be required. No Walk-ins allowed.

*******SEE BELOW REGARDING UPDATED COVID-19 REQUIREMENTS TO ATTEND TRAINING*******

In an effort to reduce the risk of COVID- 19 and to prevent the spread of the virus, in-person attendees at any meetings, conferences, and events hosted by an agency, regardless of size, will need to provide information about vaccination status. In-person attendees not fully vaccinated or do not attest their vaccination status must provide proof of a negative COVID-19 test received three (3) days prior to attending the event and must comply with CDC guidelines regarding wearing masks, maintaining physical distancing, and following other recommended health measures. As a reminder, in-person attendees in areas of high or substantial transmission must wear a mask in common areas, shared

workplaces and conference rooms regardless of vaccination status. Prior to the start of the class an email will be sent to registered attendees outlining the requirements and new guidelines.

**ATTENDEES ARE REQUIRED TO BE PRESENT DURING THE ENTIRE (3) DAY COURSE IN ORDER TO RECEIVE CREDIT FOR COURSE COMPLETION.
HOSTED BY: WASHINGTON/BALTIMORE HIDTA &
VIRGINIA DEPARTMENT OF JUSTICE SERVICES
COURSE INSTRUCTORS SPONSORED BY EPIC**

Advanced Deception Detection Course

Course Description: 24 hours. This class will help criminal justice officers recognize behavioral tells and body language associated with deception in a variety of applications. The topics include body language, communication mindsets, cognitive limitations, psychological aspects of deception, verbal analysis and questioning techniques.

This class will also focus on documenting observations in reports. The target audience for this class is patrol officers, investigators, school resource officers, correctional officers, agency trainers and background investigators

2 Courses. 1 Class. Meet Your Newest Tool.

Interview & Interrogation plus Forensic Statement Analysis

It is the case that could make your career. The chances he will confess are minimal and without it, he walks free. He'll likely hurt another innocent victim, or worse. You panic!

This FREE seminar is a must-attend for new and seasoned law enforcement. It's the only course in detecting deception on the market that teaches Behavioral Analysis (BA) AND Forensic Statement Analysis (FSA). This unique seminar improves your ability to successfully obtain court accepted confessions, in a non-confrontational manner. You learn the secrets to detect lies and obtain the truth like the pros. This sharpens your elicitation skills as you obtain more voluntary confessions and are labeled an expert in your field.

FSA is a proven scientific method to identify truth and deception in verbal and written statements through the strategic analysis of each word. Studies show that the use of certain pronouns (i.e. s/he, we, they) alone can solve 80% of your cases. It's so powerful, in many cases a person's own words can be easily transposed into numbers to determine a truthful, balanced statement. The new way to prepare for the interview is to first obtain the pure story in a written or verbal statement.

FSA method identifies sensitive topic areas to focus on as these clues are given unknowingly by the interviewee and only visible to the trained interviewer. Then, during the interview, you employ BA to accurately read body language and non-verbal cues while avoiding the 10 most common mistakes. You learn how to react to deceptive behavior by employing the 3 Strike Rule, the Verbal Lie Detector, and the Ultimate Power Question. You identify the 16 Evasive Verbal Responses and ultimately obtain the confession that will keep him behind bars while you join an elite class of distinguished investigators!

Partner: Baltimore Washington HIDTA **Dates:** 21 June 2022 - 22 June 2022
Venue: 110 Airport East, Frederick, Maryland **Times:** 8:30am - 4:30pm (ET)

FACIAL RECOGNITION TRAINING CLASS

Facial Recognition is increasingly becoming a part of law enforcement across the country. In this 8-hour course, we will provide an in-depth view of the current state of facial recognition technology, legal aspects and best deployment practices. We'll focus on the balance between how to use this technology responsibly and successfully. The trainers of this course will demonstrate the Vigilant FaceSearch program, which is a nationwide cloud-based software with known sex offenders & millions of open-source images of LEA mugshots.

FACIAL RECOGNITION TECHNOLOGY AND BEST PRACTICES

Get the chance to work through real-world scenarios on a facial recognition database, utilizing enhancement tools with step-by-step instruction. Discover how using millions of open-source images in an established gallery complements your existing local booking images. Maximize your investigative efforts by implementing facial recognition technology and improve in almost every facet of the job, including both areas of proactive field enforcement and investigations.

At the conclusion of this class, each attendee will retain access to Vigilant LEARN with login credentials for 30 days.

LICENSE PLATE RECOGNITION TRAINING CLASS

Learn about the diverse uses of License Plate Recognition (LPR) technology and how to utilize the tool in real world scenarios. Led by former law enforcement members, this course will demonstrate how to integrate a cloud based commercial LPR data platform into the existing traditional law enforcement deployment LPR model.

LICENSE PLATE RECOGNITION TECHNOLOGY AND BEST PRACTICES

While you will learn about all currently available LPR systems, this course will mostly focus on the LPR database, Vigilant PlateSearch. You will see firsthand how using billions of plate detections can maximize investigative efforts in almost every facet of the job, including both areas of proactive field enforcement and investigations.

In this course, you will be working through real-world scenarios on the Vigilant PlateSearch database, utilizing analytical tools with step-by-step instruction. In addition, you will learn how to query fixed and mobile LPR Data to generate case-solving leads.

At the conclusion of this class, each attendee will retain access to Vigilant LEARN with login credentials for 30 days.

Snaps, Tweets, Selfies

Using Social Media in Your Facial Recognition and License Plate Recognition Investigations

From posting pictures of friends and family, to sharing every event a person experiences in their daily lives, social media has become the hub for our human interaction. Because of this, your investigations will have some nexus to social media, whether it be a suspect using fake information to build profiles or your suspect using social media platforms to engage in illegal behavior. This course will teach you how to utilize Vigilant PlateSearch & FaceSearch technology to lead to successful investigations and use resources that can be beneficial in your Online police work.

VIGILANT LICENSE PLATE RECOGNITION AND FACESEARCH TECHNOLOGY

This course will include:

- Websites that will help with social media investigations
- Tools that can assist you to find individuals & plates on the World Wide Web including social media platforms.
- How to use Vigilant Tools to grab stills from videos
- Tools to document your online investigation efforts
- Five-step facial recognition investigation workflow

Open Source Intelligence

Hosted By:
Northeast Counterdrug Training Center

This course is designed for criminal intelligence analysts, special agents, and other investigators. Students with any level of familiarity with the Internet and computers, from beginning to advanced, will find this course beneficial.

The program gives students an up-to-date understanding of how social networking sites work and how members act and interact. Student will learn what information is available on various sites and how to integrate that information into criminal investigations and criminal intelligence analysis.

Too often, investigators and analysts overlook or underutilize these valuable resources. Social networking sites are virtual communities. As in any large community, criminal organizations, fraud, violet crime, and victimization exist. Investigators need to understand these communities along with the tools, tricks, and techniques to prevent, track, and solve crimes.
